

# Delta Beet Sugar Co. Tie-in Lines

## Client

Egyptian Sugar & Integrated Industries (SIIC)

## Scope of Work

Data collection  
Schematic design  
Detailed design

## Location

Kafr ElSheikh, Egypt

## Types of Activities

Industrial  
Structural

Delta Sugar Co. (DSC) is the leading producer of beet sugar in Egypt providing more than 25% of the country's sugar requirements.

SIIC assigned ECG to perform the engineering services for the design of the tie-in lines between the different units

with their supporting structure. The design includes a pipe bridge crossing 22 meters wide on the public road; encompassing tie-in lines with battery limits of different units, piping layout, pipe routing, pipe supports, isometrics, and piping stress analysis.
