

KIMA Ammonia and Urea Fertilizers Plant

Client

Tecnimont S.p.A

Scope of Work

- Endorse and countersign the complete set of civil documentation
- Undertake the responsibility of the design before local authority

Tecnimont S.p.A., main subsidiary of Maire Tecnimont Group, has been awarded an engineering procurement-construction-commissioning (EPCC) contract on a lump-sum turnkey basis for the realization of a new fertilizers complex within the existing industrial area in the Aswan governorate (Upper Egypt). The owner is Egyptian Chemical & Fertilizers Industries – KIMA; an Egypt-based company that operates in the chemical sector.

The new fertilizers complex will be composed of:

- One ammonia production unit of 1,200 tons/day

Location

Aswan, Egypt

Types of Activities

Architectural
Structural

- capacity, implementing the KBR “Purifier” technology;
- One urea melt & granulation production unit of 1,575 tons/day capacity implementing the “Granulated Urea” technology of Stamicarbon;and
- All the necessary utilities & off-site facilities to support the process units.

The completion is expected by the end of 2017 and production is expected to start by early 2018 with a total investment of about USD 550 million.
