HVAC  
Landscape  
Mechanical  
Roads  
Structural

Marsa Alam International Airport is a growing airport in Red Sea, Egypt. It was inaugurated during 2003 in response to the increasing needs of European travelers to this Southern Red Sea destination.

The project aimed at expanding the airport and its associated facilities by having a new international arrival hall with a total area of 1,110 m<sup>2</sup> and a new international hall with an area of 550 m<sup>2</sup>. The extension also included modification of the existing area/ systems and facilities to cope up with proposed extension.
