## Client

Al Sharqiya Sugar Manufacturing S.A.E (Al Nouran Sugar)

## Scope of Work

Loan Management

## Location

Egypt

## Types of Activities

Loan Management

Contracts

Cost Estimation

Al-Sharkeya Sugar Manufacturing (ASSM) is established to address the expanding and unfulfilled demand for quality white sugar in Egypt and the MENA Region. ASSM is a green field project, building Egypt's first state-of-the-art of sugar production facility in the Governorate of Al-Sharkeya, with a total investment cost of EGP 6 Billion.

It was necessary for the company to expand the two warehouses to accommodate more storage space for the

sugar, in addition to the construction of new warehouses to be used as an additional storage for finished products accommodating around (60) thousand tons of white sugar. They also may be used to accommodate around (25) thousand tons of raw sugar.
