The project comprises the construction of a new Presidential Lounge (VVIP Terminal) at Banjul International Airport.

With a total BUA of 1,200 m²; the new pavilion aims to provide a more modern image of the airport, meet

the International Protocol requirements for high-level reception, and allow direct access from the plane park stand (tarmac) to the car parking.

Presidential Lounge (VVIP Terminal) at Banjul International Airport

Employing high-standard architecture and interior design with artificial and natural lighting, wall and floor finishes, and suspended ceilings; the one-floor building includes the following components:
